# [INTRODUCTION]

BunnyVerse (BNV) is more than just a meme. It is an ERC 20 token with the actual utility connected to it. The BunnyVerse team has the ambition to create its own ecosystem. Our ecosystem will work hard to deliver the best product out in crypto, web3 and metaverse space.

The BunnyVerse will be a platform and launchpad for newly developed and released games targeting sophisticated gaming audiences.

The BunnyVerse Token [\$BNV] is the organizing token for the platform. It is the fuel for the entire ecosystem. By holding this token, the holders will get access to the presale for upcoming projects. The token is currently available on **ShibaSwap.com** and **UniSwap.com**

# [ VISION ]

Our vision is to create a trusted Gaming platform. As we grow our network, there will be more beautiful games coming and proposals for running games on our platform, and there will be more trust in our network from all of our game players. All games will be verified and maintained by our auditing team to ensure rug-free crypto assets to all investors.

The BunnyVerse is designed for the best metaverse gaming experience possible. The platform will provide a truly decentralized gaming blockchain as a service with decentralized technologies and MINIMAL transaction fees.

**Additional resources and platforms will be added over time.**

- \* NFT Marketplace [SuperKluster]
- \* DAO [Shiba Inu's doggy DAO]
- \* Additional Bunnyverse games
- \* New games from outside developers

# BUNNYVERSE 3D GAME

To introduce users to the platform and to familiarize them to the story of the Leporiads (the rabbit-folk who created the BunnyVerse), “PREQUEL/prototype” of the main simulation will be made available first. A mobile, birds-eye-view strategy game tells the story of The Battle of Sarnas. Players must destroy the Sarnassian Towers that are threatening the Wizard King’s empire.

The “prequel/prototype” game will be built using the Avalanche Network prior to the full game’s integration with the **Voxel X Network**. Prototype game play will utilize the **AVAX token** to minimize transaction fees

# THE SEARCH FOR WARREN METAVVERSE GAME

## [SEASON ONE]

The Search for Warren simulations in the Bunnyverse are immersive role-player-games. Each season (released over time) takes users through various challenges and missions. Season One begins after the Battle of Sarnas (prequel) where the Leporiads are banished by the Wizard King and must find their way back to their Warren (home) The simulations/game will utilize **Voxel X Network's Blockchain** to deliver responsive game play with low transaction fees.

# [ PFP NFT PROJECT ]

A generative art PFP project enabling \$BNV holders to mint a The Search for Warren NFT prior to the full game launching.

- \* Each NFT has distinct characteristics algorithmically created as users mint their PFP. (Rare, Semi-Rare and Common)
- \* PFPs will impact a holder's status and/or character in the BunnyVerse
- \* The PFP NFTs will be composable, increasing in rarity as the holder plays the game, accomplishes tasks and earns new assets.
- \* NFTs will be tradeable/sellable within the SUPERKLUSTER NFT Marketplace.
- \* NFTs will be transferable within the Bunnyverse. As new games and world's are added to the platform, PFP's status/characteristics can be utilized platform wide.

## PFP Characteristics

- \* Background Color
- \* Background Image
- \* Rank (earrings)
- \* Hairstyle
- \* Clothing
- \* Wisdom Level
- \* Face Paint
- \* Fur Color

# ROADMAP 2022

## SECOND QUARTER

- TSFW Prequel Beta Launch [Stakeholder Testing]
- TSFW Prequel Public launch
- TSFW Generative PFP NFT launch [SuperKluster]
- Continue marketing & PR
- TSFW Metaverse:
  - storyboarding, modeling & design complete
  - Begin physics and mechanics development
- BNV Holder Target = 10,000

## FOURTH QUARTER

- TSFW Metaverse
  - Physics & Mechanics complete
  - Rendering
  - Testing
  - Game patching & balancing
- TSFW Metaverse Launch
- Media event
- Shiba Doggy DAO Integration complete
- BNV Holder Target = 30,000

01

02

03

04

## FIRST QUARTER

- Announce Shiba Swap + Voxel X GameFi & Metaverse Partnership
- Establish new marketing channels,PR
- Bunnyverse Video White Paper reveal
- The Search for Warren (TSFW) Metaverse Game Reveal
- Development of TSFW Birds-eye-view strategy game [prototype/Prequel]
- Storyboarding of TSFW Metaverse RPG game
- Integration with Voxel X Blockchain begins

## THIRD QUARTER

- TSFW Metaverse
  - Audio & VFX
  - design commences
- Reward system and leaderboards completed
- TSFW Metaverse launch date announce
- Marketing & PR increase around launch date announce
- Begin Shiba Doggy DAO integration [pending Shiba release schedule]
- BNV Holder Target = 20,000
